ABSTRACT TOPIC: ONLINE PIZZA ORDERING SYSTEM

PROJECT NATURE: NEW TOPIC

COMPLETION LEVEL: ZERO

Online Pizza ordering system is a web-based application which enables customers to order their pizzas online for home delivery or pick up from the pizzeria. You must have ordered your pizzas by phone for home delivery. The process seems easy to use but at times there is miscommunication. It's a time-consuming process which at times irritates customers. Also, it takes a lot of time of the pizzeria staff. It would be much more comfortable for the customers to have an online pizza ordering system. It would be free for users as they can select the pizzas they want and make payment for it. Also, it will reduce the purchasing time for customers. After selecting the items to be ordered, the customer has to select the type of order whether it will be a home delivery or pick up and reserving available. After that, the customer has to provide his/her details like name, phone number, address, email id. Now payment option is shown to the customer. He has to choose from the various online payment methods or cash on delivery option.

MODULES

- ➢ **ADMIN**
- ➢ **USER**
- ➢ **EMPLOYEE**

MODULES DESCRIPTION

ADMIN

The tasks which can be performed by the admin are:

1. Admin can add/edit/delete different ingredients into the system.
   Admin can add/edit/delete new pizzas, their images, order details, feedback, prices and other details. The same functions can be performed for non-pizza items.
2. Admin can add/edit/delete users in this system.
3. Admin has rights to add/edit/delete orders for customers.
4. Admin can track order details.

USER

Login/Sign Up

When a customer visits the online pizza ordering system of any pizzeria, he will be asked to log in or sign up for them for a better experience. The customer has to create a unique username and a password. Then he /she need to enter details like Name, phone number, address. After these steps account of that customer will be created. The ingredients in this

pizza can be changed according to the customer interests. The customer can select any pizza from the menu or build the custom pizza.

Add To Cart

This feature is useful in a situation where you have to order more than one pizza or other nonpizza items. Suppose you have selected a pizza and now you want to select other pizza as well. Then you just have to add that pizza to the cart using the Add to cart option. Items added to the cart will be saved so that you can choose other pizzas as well. Finally, when you are ready to order you can check out from the cart to make payment.

Payment

There will be basically two payment options i.e. online payment using Credit/Debit cards and cash on delivery Before making payment your order details are shown and confirmed.

Track order

- This is another interesting feature which helps customers to keep a track of his order.

Feedback

Feedback details for pizza

EMPLOYEE

Track Orders details

- View order status and order track details
